**Product Description**

**Mainframe Utility**

DUPLEX/SYNCHRO, offered as an individual product or as a part of Technetron Duplex Subsystem (TDS), enhances CA-IDMS® processing. It is offered as a batch utility which assists users in copying database and direct access (disk) journal files, and as the queue/resync module in the Central Version environment. DUPLEX/SYNCHRO is especially useful for CA-IDMS environment enhanced with DB/DUPLEX® or JOURNAL/DUPLEX® in (re)synchronizing primary and duplex files.

Current Level: Release 4.1

Type of License: CPU/SITE

Installation: User, 30 Day Trial

**Highlights**

- Operates as an independent batch utility or integrated TDS modules
- Synchronization process controlled by Job Control Language and DB/DYNAM®
- Simple setup with no control cards or parameters
- Multi-file operation with overlapping I/Os

**Technical Information**

Deliverables: Pre-assembled BAL program, macros, sample installation and documentations.
